Commercial TSDf	Commercial TSDf -- Indicates that the facility is a commercial operator of transporting, storing and disposing of hazardous waste.
Federal Generator	Federal Generator Status -- Indicates the regulatory status of the site as determined by the quantity and/or toxicity of hazardous wastes generated, stored or accumulated over a specified period of time.
Furnace Exemption	Smelting, Melting, and Refining Furnace Exemption -- Indicates that the facility with smelting, melting, and refining furnaces and processes hazardous wastes solely for metals recovery are conditionally exempt from regulation.
HSM	HSM -- Indicates that the facility manages hazardous secondary material(s) (e.g. spent material, by-product or sludge) that when discarded, would be identified as hazardous waste.
Importer	Importer -- Indicates that the facility is engaged in importing hazardous waste into the United States from a foreign country.
Lg Qty Universal Waste	Large Quantity Handler of Universal -- Indicates that the handler accumulates large quantities of federally regulated waste on site. The handler generates, in a calendar month, 1,000 kg (2,200 lbs.) or more of RCRA hazardous waste; or accumulates at any time, more than 1 kg (2.2 lbs.) of RCRA acute hazardous waste; or accumulates at any time, more than 100 kg (220 lbs.) of spill cleanup material contaminated with acute hazardous waste.
Mixed Waste Generator	Mixed Waste Generator -- Indicates that the facility is a generator or TSDf that handles waste mixed with nuclear source, special nuclear or by-product material.
Onsite Burner Exempt	On-Site Burner Exempt -- Indicates a facility that burns small quantities of hazardous waste in an on-site boiler or industrial furnace, in accordance with 40 CFR 266.108, is conditionally exempt from regulation for that activity.

Recycler	Recycler -- Indicates that the facility is engaged in the recycling of hazardous materials.
Short Term Generator	Short Term Generator -- Indicates that the facility is a short term or one time event generator and not generating from ongoing processes.
State Generator	State Generator Status -- Indicates the regulatory status of the site in view of implementing the State's "broader in scope" or "more stringent than" rules. Although an implementing State might use terms that differ for their generators these terms would be translated to match the Federal regulatory term.
